Examiner's Statement of Reasons for Allowance

Drawings

1. The drawings submitted have been reviewed and determined to facilitate understanding of the invention. The drawings are accepted as submitted.

2. Claims 26-44 are allowed. Claims 26-44 describe a molecular system capable of undergoing an electric field induced band gap change that occurs via a molecular conformation change or isomerization, a change of extended conjugation via chemical bonding or molecular folding or stretching.

3. U.S. Patent No. 5,159,421 to Wolff describes a system capable of undergoing an electric field induced band gap change (see Column 4, Lines 39-60). Wolff does not describe the mechanism by which the electric field induces the band gap change.

4. U.S. Patent No. 5,159,421 to Wolff remains the closest prior art of record in this application. For the reasons stated above, however, Claims 26-44 herein are deemed to patentably distinguish over Wolff and all other prior art of record.

Conclusion

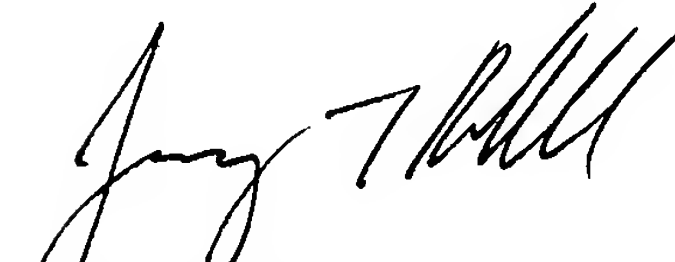

5. Prior art documents submitted by applicant in the Information Disclosure Statement filed on 16 September 2003 have all been considered and made of record (note the attached copy of form PTO-1449).

6. Any inquiry concerning this communication or earlier communications from the examiner should be directed to Jerry T Rahll whose telephone number is (571) 272-2356. The examiner can normally be reached on M-F (8:00-5:30), with alternate Fridays off.
